PROFILE

Experienced Full Stack developer with a strong focus on backend development using Node.js, Nest.js, and database management with MongoDB and PostgreSQL. Skilled in designing RESTful APIs, optimizing database queries, and ensuring code quality through testing methodologies. Hands-on experience with cloud services, authentication protocols, and scalable architectures.

WORK EXPERIENCE

Full Stack Developer

Geek Squad Studio

2025-02 – present
Bangkok, Thailand

- Developing and maintaining full-stack CMS applications using React.js, Next.js, Node.js, and Express.js
- Managing and interacting with databases using Prisma ORM, enabling type-safe and scalable data access
- Migrating legacy MySQL structures to Prisma for improved development efficiency and maintainability
- Building modern, responsive user interfaces using MUI (Material-UI)
- Implementing and integrating RESTful APIs and third-party services
- Deploying and managing applications with AWS services including Amplify Gen2 and Lambda
- Containerizing applications with Docker for streamlined deployment and scalability
- Ensuring application performance, security, and SEO optimization
- Collaborating closely with designers, product owners, and scrum masters in agile development cycles
- Writing clean, maintainable, and well-documented code aligned with best practices

Mid-Senior Mobile Developer

Myan Ants 🌐

2024-09 – 2024-12
Remote

- Developed and maintained key features for a mobile cleaning and maid services app using React Native and Expo CLI.
- Integrated Google Maps API for location tracking and Firebase Cloud Messaging (FCM) with Notifee for push notifications.
- Implemented Redux Toolkit for state management and React Query with Axios for API handling.
- Ensured robust API integration, data handling, and real-time synchronization with backend services.

Mid Mobile Developer

Theory IT Solutions

2023-11 – 2024-03
Yangon, Myanmar

- Improved e-learning applications by integrating interactive and user-friendly features, enhancing engagement and learning outcomes.
- Addressed cross-platform compatibility issues to optimize performance and usability on various devices.
- Worked closely with cross-functional teams to deliver robust solutions under tight deadlines.
- Established seamless communication between frontend and backend systems through RESTful API integration.
- Configured Firebase Cloud Messaging (FCM) and Notifee to handle notifications, ensuring users remained informed about key updates and events.
- Troubleshooted and resolved complex issues, ensuring consistent functionality and a smooth user experience across devices.

- Maintained and organized source code using GitHub, implementing clear commit histories and adhering to version control best practices.
- Developed multi languages app using localization and library (React Native Languages and i18n).
- Publishing android application on google play store.

Junior-Mid Mobile Developer

ACE Data Systems Ltd 

2023-01 – 2024-04
Yangon, Myanmar

- Worked as Mobile developer, done five banking projects in application by using React Native framework.
- Discuss and developed project flow with project manager, cross-functional team, UI/UX designer, and team leader.
- Delivered mobile applications on time by implementing complex features, optimizing performance, and working with cross-functional teams to achieve project goals.
- Created intuitive and engaging mobile screens to improve user experience and interaction.
- Wrote reusable, scalable, and optimized code, streamlining app development and maintenance processes.
- Integrated REST APIs and managed state using Redux Toolkit and React Query.
- Configured Firebase Cloud Messaging (FCM) with Notifee for managing notifications, keeping users informed about transactions and updates.
- Used GitLab for source code management, maintaining a well-structured codebase with clear commit histories.
- Conducted thorough testing, debugging, and optimization of mobile applications to ensure stability and high performance.
- Resolved responsive design issues, flexbox layout challenges, and functional bugs across various mobile devices.
- Integrated native features like biometric authentication to provide enhanced security measures for users.
- Developed multi languages using localization and library (React Native Languages and i18n).
- Publishing android application on google play store.
